

My name is Laura Hesson. I am married and the mother of six children. Three of them have already graduated from WCSD. The other three are still in school here. I have been on the school board for six years. I got involved in the board because of my experience in PTA. I started doing PTA to benefit my own children, but soon learned that it benefited more children than just my own. I believe that parents are crucial in their children's education. I also believe that when parents, teachers and administrator's work together, great things will happen. Still having children in the schools makes it very easy for me to stay connected to what is actually happening. I am involved in my children's schools. I believe I bring a "parent" voice to the board because of my involvement. I believe we have good schools here, but I also know there is always room for improvement. I am willing to listen to concerns and issues. I am fiscally conservative with the precious tax dollars we receive. I am passionate about what I do. I love serving on the board. It would be a great pleasure to continue to serve in this capacity.
